Malayalam	    

PROFILE

Problem solving, conflict management, decision making, and adaptability are some of the core values that I possess, combined with a great passion for the IT Industry. I assure to produce high standards of work. I have excellent interpersonal skills enabling to effectively build rapport with team members and superiors. I would like an opportunity to utilize my technical skills in a work environment and in due time become a valuable asset to the organization.

TECHNICAL SUMMARY

- **Docker** - Experience in Docker containerization, customization docker images, File creation, Docker network, Docker volume, Docker compose.
- Understanding about Container Orchestration tools called Docker & Kubernetes.
- **AWS** - Understanding about EC2, Security group, key pair, IAM, S3 Bucket, EKS, Auto Scaler.
- Basic understanding about the different types of cloud environments such as Public, Private and Hybrid cloud.
- **CI CD** - I have been part of Build creation for all sub products in Windows, Linux operating systems. Automated build creation process with Jenkins.
- Worked with management and development team to get proper requirement regarding changes in build.
- Hands on in Jenkins declarative script, One-Click Deployment, Parallel Jobs, and setting up Distribution Job in the cloud with multiple nodes to achieve CI-CD using Jenkins tool.
- Worked with support team to analyze and handle customer issues regarding product installation and user environment.
- Good hands-on knowledge of Source Code Management (Version Control System) tools like Git and subversion.
- Proficient in developing Continuous Integration/ Delivery pipelines.

WORK EXPERIENCE

COMPANY :

Duratech solutions

- DevOps adoption of LMS Portal for DatInfi Coimbatore
- Duration: 2022 to 2023
- In this project, the LMS portal was upgraded from simple moodle to Java Springboot based microservices framework. The microservices application is containerized in Docker & deployed on AWS EKS kubernetes cluster. CI CD pipeline based deployment automation is also planned
- Containerizing the Java spring boot applications, creating or setting necessary environment variables for configurable properties
- Pushing & managing application containers in the docker hub
- Troubleshooting application failures or container crashes by checking container errors
- Project is close to initial production for wider audience after small pilot deployment

SOFT SKILLS

- Team leadership
 - Communication
 - Problem solving
 - Flexibility
-
